

Dr. Crystal Eng Practice Limited to Diseases of the Animal Eye

Dr. Eng was born and raised in Houston, Texas. She grew up wanting to practice zoological and exotic animal medicine.

In 2006 she graduated from Texas A&M University with her B.S. in Biomedical Science and Animal Science and earned her Doctor of Veterinary Medicine in 2013. Dr. Eng originally practiced mixed animal medicine and surgery before transitioning to small animal emergency for 3 years prior to pursuing her specialty in veterinary ophthalmology.

In her free time, Dr. Eng enjoys kite surfing in Hawaii, riding elephants, and visiting Disney World.

Dr. Corbin Telford Ophthalmology Resident

Dr. Telford was born a Texan, though raised a North Carolinian.

In 2010, he received his Bachelor of Science in Biology at Elon University in North Carolina. He then earned his Doctorate of Veterinary Medicine at the North Carolina

State University College of Veterinary Medicine in 2016. The following year, he completed a Small Animal Medicine & Surgery internship at Oklahoma State's College of Veterinary Medicine in Stillwater, OK.

Upon returning to Texas in 2018, Dr. Telford cared for the pets in Dallas as a general practitioner with a passion for ophthalmology. He began his 3-year residency at Veterinary Eye Institute in the summer of 2019.

Dr. Telford's professional interests revolve around ocular biotechnology and drug development, having performed research in The Gilger Lab while studying at North Carolina State University.

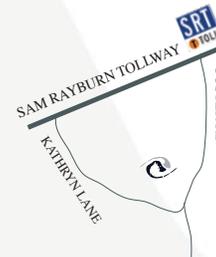

In his free time, Dr. Telford enjoys staying active in any way, though possesses a love for tennis, sand volleyball, and soccer (an avid follower of Liverpool F.C.). Lastly, he splits his time between being a resident at VEI and a "dad" to a spoiled, blind cat named Coraline.

To make the world a visually
clear and comfortable place
for pets – to do so in a
kind, collaborative, and
compassionate way.

**Our Mission guides
the work we do,
how we do it, and what you
should expect of us.**

Vision. Comfort. Compassion.

Specialty Veterinary Care

What is a specialist and why am I seeing one?

Veterinary specialists, not unlike specialists in the fields of human medicine, have devoted additional time to education and specialty training beyond the schooling and licensing required to practice general veterinary medicine. This additional training for veterinary ophthalmologists includes a three-year residency in ophthalmology and extensive testing, both overseen by the American College of Veterinary Ophthalmology (ABVO). With a completed ABVO approved residency and successful completion of ABVO testing, ACVO Diplomate status is granted.

Our Doctors investment in becoming a boarded ophthalmology specialist is an investment in providing the best care available for your family member.

How does VEI work with my primary veterinarian?

The partnership and close collaboration between VEI and your primary veterinarian ensures the best, and most efficient care for your pet's eye problem. Our practice will remain in close contact with your primary veterinarian while your pet is in our care, and we will work together to ensure recovery is going smoothly once patients are discharged from our services.

We consider the primary veterinarian a key member of the care team while your pet is in our hands.

Veterinary Eye Institute – Great Patient Care With a Uniquely Positive Client Experience

The referral appointment

VEI offers two convenient locations within the Dallas/Ft. Worth metroplex to better serve our clients, patients, and referring veterinarians. To schedule your consult, please call our **Plano** location at **(972) 727-2020** or our **Dallas** location at **(469) 912-2020**. We will get you scheduled to see one of our doctors as quickly as possible.

What to expect

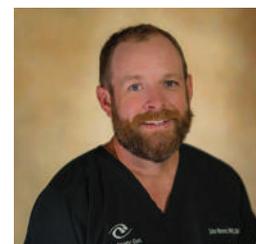

At your first appointment, we will gather information from you on the development of your pet's eye problem. Based on this information and a thorough examination, we will provide you with a clear understanding of your pet's diagnosis and what we recommend for treatment. VEI's approach is exemplified in our practice motto:

- 1. Vision.**
Our goal is to provide your pet with lifelong functional vision.
- 2. Comfort.**
You want your family member to be pain free and so do we.
- 3. Compassion.**
We will treat our patients and clients kindly and compassionately.

Once you decide how you would like to proceed, we will walk you through the process of scheduling any additional tests or procedures.

As we gain clarity on your pet's eye problem and once a treatment plan is determined, your primary veterinarian will be updated by VEI through a series of phone calls and detailed reports.

Our doctors are readily available to answer questions you may have regarding your pet's eye condition or the treatment plan recommended.

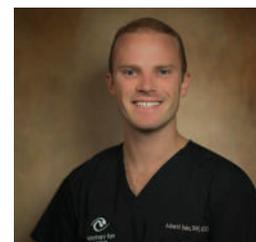

Dr. John Warren

Dr. John Warren has practiced his lifelong passion for animals since 2003, when he graduated from Louisiana State University School of Veterinary Medicine.

Dr. Warren's specialty training included a three-year residency which led him to a commitment to the field of ophthalmology. He has practiced veterinary ophthalmology exclusively since 2006. Dr. Warren points to his years in general veterinary practice for providing the grounding and diverse experience that has allowed him to build a loyal following amongst referring veterinarians and clients alike.

Dr. Warren's commitment to the client experience is well expressed in his frequent reminder to his team: "We provide exemplary care for pets...But it's a people business that we're in."

Dr. Andrew Enders

Dr. Andrew Enders grew up in Pasadena, Maryland, where he spent his free time hunting, practicing martial arts (he has two black belts), and studying Spanish, in which he is now

fluent. He received his B.S. degree in Animal and Veterinary Sciences from Clemson University in 2011, after only three years. He remains an avid Clemson football fan to this day. Dr. Enders received his D.V.M. degree from Cornell University in 2015. After leaving Ithaca, he completed a rotating small animal internship at the Animal Medical Center in New York City and stands by the statement that it was truly the best year of his life. From there he moved to Blacksburg, Virginia to complete his ophthalmology residency, concurrently receiving his M.S. degree in Biomedical and Veterinary Sciences researching alternative therapies for canine glaucoma.

Dr. Enders is an avid traveler and has explored thirty-six states and twenty-six countries. He has a particular interest in inherited ocular disease and equine ophthalmology.
